ROXYANDRICH.COM

WATER-SOLUBLE FOOD COLOUR OBTAINED BY DISSOLVING THE POWDER IN WATER, PROPYLENE GLYCOL OR GLYCERINE.

This type of colouring is used for water-based food products. It is perfect for sugar work (during baking), macaroons, icing, cake and cream. It cannot, however, be used directly in food or to colour fatty substances, such as chocolate.

ADVANTAGES

- Matte finish
- Highly concentrated colour
- Excellent quality-price ratio

USING WATER-SOLUBLE DUST

Highly concentrated colour. The tip of a knife of Water-Soluble Dust is enough to colour a 1-litre solution.

AVAILABLE IN JARS OF 25 g, 50 g, 250 g AND 500 g.

FORMULA

MATTE

WATER-SOLUBLE
